Objective

I'm looking for a front-end developer position. I have commercial experience of front-end development, early completed projects by myself below and completed several courses include 0.5-year front-end course by The Rolling Scopes (EPAM).

Projects

- Submittal.com
- news app (Redux, React, JS, CSS)
- instagram faves (Firebase, JS, CSS)
- interactive lumber calculator (React, JS)
- dev.by parser (Node JS)
- web-calendar with notes (React)
- landing pages with Perfect Pixel (HTML, CSS)
- validation adaptive form (JS, HTML, CSS)

- songs-manager (React, JS)
- task-manager (React, Redux)

- sort algorithms, image recovery, database (structure "trie") etc. (C native)
- shares-trading website (exchange) (Python + Flask, SQL (phpLiteAdmin))
